

Coconut Coir Bristle Fiber

Coconut Coir Bristle Fiber, also known as Coco Fiber, is a natural and waterproof coarse fiber extracted from mature coconut husks. It is resistant to saltwater damage and comes in white or brown varieties based on coconut maturity. We offer Coir Bristle Fiber in various sizes, colors, and qualities to suit different applications.

To obtain the fiber, the husk is separated and crushed, releasing the stiff, straight, and long bristle fiber. Different grades exist based on length and quality.

Coir fiber finds applications in diverse industries. It is used for manufacturing floor mats, brushes, and automobile parts, benefiting from its durability and water-resistant properties. Additionally, coir fiber is utilized in erosion control, geotextiles, upholstery padding, and insulation.

Advantages:

1. Waterproof and saltwater resistant.
2. Durable and long-lasting.
3. Sustainable and eco-friendly.
4. Versatile applications in floor mats, brushes, erosion control, geotextiles, upholstery padding, and insulation.
5. Excellent moisture management.
6. Natural resistance to pests and mold.
7. Lightweight and easy to handle.
8. Provides thermal insulation.

Our Product Specifications

Product Name		Coconut Coir Bristle Fiber	Product Photo
Material	100% Coconut Coir Fiber		
Brand Name	Greenpeatcoco		
Application	manufacturing floor mats, brushes, and automobile parts		
Type	Coconut Fiber		
Pattern	Bleached, Natural, Colored, Waxed - Uncut / Cut		
Fineness	1, 2, and 3 tie		
Fiber Length	Average 25 to 30cm		
Packing	12.5 - 13 kg per pp bag / With PP Bags or Bundling		
Services	OEM / ODM / Private Label		
Customization	Possible		
Specifications can be changed with the buyer's preferences
