

## Husk Chip Briquettes

Briquettes are specially produced for home gardening and hobby growers for gardening, cropping and all horticulture and hydroponic as potting mixture or soil conditioner. Husk chips (Cair Mulch) produced from the husks at the outer layer of coconut nut consists of long fibers and sponge-like pith particles. Coconut husk chip is cut into ¼ inch to 1 inch size husk chips. Coconut husk chips which are ideal for potting mixer to increase air fill porosity and water holding capacity. Husk Chips are ideal for home gardening, horticulture especially for orchids, Bromeliads, Gerbera, Anthurium, Clivia, Roses, etc. Coconut husk chips are superior for Hydro absorb and water distribution. Coconut husk chips are one of the best soil conditioners found in the growing world which bear comparatively high-water holding capacity (8-10 times its weight). This is ideal to retain moisture in soil during hot summers.

### Advantages:

- 100% natural and renewable resources.
- Ideal for potting mixer to Increase air fill porosity and water holding capacity.
- Briquettes are an ideal handy retail pack for home gardening, horticulture specially for orchids, Bromeliads, Gerbera, Anthurium, Clivia, Roses, etc.,
- Helps to keep the soil loose and airy, helping in better root growth.
- Husk Chips are very hydrophilic and quickly absorb water making it easy to use.
