

25kg Cocopeat Bales

"Green Peat Coco" Cocopeat 25kg bags: Experience the extraordinary benefits of 100% Coco peat with our versatile and practical bags. Specifically designed for farming, gardening, and seed production, these bags serve as exceptional soil conditioners, offering a wide range of advantages for plant growth and development. With the remarkable ability to hold eight times their weight in moisture, they ensure efficient water retention, reducing the need for frequent watering and promoting healthy hydration for plants even in challenging environments. Gradually releasing essential minerals over an extended period, these bags enrich the soil, providing a steady supply of nutrients for sustained plant nourishment. The outstanding aeration qualities of Coco peat create a well-structured soil environment, supporting optimal airflow and preventing soil compaction, which in turn encourages robust root growth and overall plant health. With a low compression ratio, these bags are easy to handle, allowing for convenient usage during planting and potting activities.

Advantages:

1. **Versatile Mixing Capabilities:** Mix it with sand, compost, and fertilizer to create high-quality potting soil.
2. **Suitable for Various Applications:** Perfect for gardening, landscaping, golf courses, turf dressing, animal bedding, mushroom/vegetable/flower cultivation, farms, and greenhouses.
3. **Enhanced Root Growth:** Promote better root growth with loose and airy soil conditions.
4. **Hydrophilic and Quick Water Absorption:** Dry cocopeat exhibits excellent hydrophilic properties, absorbing water rapidly for easy usage.
5. **Eco-Friendly and Biodegradable:** Our cocopeat contains no added chemicals and poses no disposal problems, as it is 100% biodegradable.

Product Name	Cocopeat Bales
Type	Cocopeat
Form	Bales
Size	75x45x30cm, as per customer's requirement
Material	100% Cocopeat
Weight	25-30 kg
